

I'll compile this as one Bullhorn snapshot and use 2026 year-to-date for placement metrics. I'll treat "active opportunities" as New, Qualified, Open, and Qualifying unless the raw soft-deleted comparison requires broader inclusion.

Called tool

The job-order `branch` field is coming back empty, so I'm using the populated owner/office attribution available on the records and will flag that limitation in the final snapshot.

Looked for available tools

Looked for available tools

Looked for available tools

I have the active pipeline by stage already: **23 total**, with **18 in New or Qualified**. I'm now checking the clearance candidate request separately because it needs résumé-text matching, not placement/job-order aggregation.

Thought for 4m 19s

Staffing snapshot for 2026 so far

A note on "office": the Bullhorn `branch` field came back empty on the job records I checked, so the office breakdown below uses the populated owner/house-owner attribution where available. For true office reporting, the Bullhorn office/branch field would need to be populated consistently.

Core totals

Metric	Count
Open requisitions	398

Metric	Count
Confirmed placements this year	98
All placements this year, all statuses	123
Active opportunities	23
Raw active opportunities including soft-deleted	24
Confirmed placement statuses used: Approved, Completed, Ended .	

1. Placements by employment type

Employment Type	Confirmed Placements	Share
Contract	64	65.3%
Contract to Hire	26	26.5%
Direct Hire	8	8.2%
Total	98	100%

2. Placements this year vs recruiter leaderboard

You have made **98 confirmed placements this year**.

This **does match** the confirmed placement count used in the recruiter/owner leaderboard logic, provided the leaderboard is summing only these statuses:

Included Status	Counted?
Approved	Yes
Completed	Yes
Ended	Yes
Submitted	No
Canceled	No
Archive	No

If Submitted, Canceled, or Archive are included, the placement total becomes **123**, not 98.

3. Q1 vs Q2-to-date placements by employment type

Confirmed placements only

Quarter	Contract	Contract to Hire	Direct Hire	Total
Q1 2026, Jan-Mar	37	19	4	60
Q2 2026 so far	27	7	4	38
YTD Total	64	26	8	98

Q2-to-date is down **22 confirmed placements** compared with Q1.

4. MYT-Ottawa snapshot

Using owner **MYT-Ottawa House**:

Metric	Count
Open requisitions	1
Active opportunities	0

Open MYT-Ottawa job:

ID	Job	Status	Link
31887	Master Production Scheduler	Canceled, but <code>isOpen:true</code>	https://cls45.bullhornstaffing.com/BullhornStaffing/OpenWindow.cfm?Entity=JobOrder&id=31887 ↗

Important: this job is technically returned as open because `isOpen:true` , even though the job status is **Canceled**.

5. Stale open jobs, open more than 90 days

Using a 90-day cutoff from **June 21, 2026**, there are **107 stale open requisitions**.

The worst aging problem appears to be with **Tarra Dziuoman’s owner/office bucket**, with roughly **47 stale open reqs** in the records returned. The next largest stale buckets are Ryan Oliver and Sam Osman.

Examples of stale open jobs:

ID	Job	Status	Owner	Link
31887	Master Production Scheduler	Canceled	MYT-Ottawa House	https://cls45.bullhornstaffing.com/BullhornStaffing/OpenWindow.c...Entity=JobOrder&id=31887
34633	Project Manager - Transmission & Distribution	Accepting Candidates	Tarra Dziuwan	https://cls45.bullhornstaffing.com/BullhornStaffing/OpenWindow.c...Entity=JobOrder&id=34633
34518	Project Manager - Distribution	Accepting Candidates	Tarra Dziuwan	https://cls45.bullhornstaffing.com/BullhornStaffing/OpenWindow.c...Entity=JobOrder&id=34518
34260	Sr Electrical Engineer	Accepting Candidates	Kaniz Abedin	https://cls45.bullhornstaffing.com/BullhornStaffing/OpenWindow.c...Entity=JobOrder&id=34260
33847	Structural Engineering Department Manager	Accepting Candidates	Ryan Oliver	https://cls45.bullhornstaffing.com/BullhornStaffing/OpenWindow.c...Entity=JobOrder&id=33847

6. Active opportunities by stage

Stage	Count
Qualified	14
New	4
Open	4
Qualifying	1
Total Active Pipeline	23

Brand-new or qualified:

Stage Group	Count
New	4
Qualified	14
New + Qualified	18

7. All placements this year, including pending and canceled

Status	Count
Approved	83
Ended	9
Completed	6
Submitted	8
Canceled	13
Archive	4
Total	123

Confirmed-only total remains **98**.

8. Job orders with status exactly “Open”

There are **0 job orders** with status exactly **Open**.

This is different from open requisitions. Open requisitions are counted using `isOpen:true`, which returns **398**.

9. Active opportunities including soft-deleted records

Metric	Count
Active opportunities, normal filters	23
Active opportunities, including soft-deleted	24
Soft-deleted opportunities normally hidden	1

So the raw active-opportunity count is **24**, with **1 soft-deleted active opportunity** normally hidden.

10. Active security-clearance candidate match

Top résumé-confirmed match: **REZAUR SIKDER**, Candidate ID **3689943**

Status: **Active**

Occupation: **Cloud Computing Architect**

Bullhorn: <https://cls45.bullhornstaffing.com/BullhornStaffing/OpenWindow.cfm?Entity=Candidate&id=3689943> ↗

Résumé clearance highlights found:

Confirmed Term	Evidence
TS/SCI	Résumé includes “Active TS/SCI Clearance”
Secret clearance	Résumé includes “SECRET CLEARANCE”
Top Secret	Résumé includes “Active Top Secret/SCI”

The highest-ranked search result was Harold Briner, but Bullhorn did not have readable résumé text or attachments available for him, so REZAUR SIKDER is the best résumé-confirmed match.
